ANGA COM is indispensable for us as a leading exchange platform and driver of fiber optic expansion in Germany. The focus on open access and cooperation is particularly important to us, as it is the key to accelerated and economically successful digitalization. My conclusion: The industry is moving closer together, and we now need courageous achievers to put theory into practice and finally catapult Germany into the fiber age.

ANGA COM is an excellent industry exchange every year, where top management colleagues from the most important companies in the industry come together and are easily accessible for participants.
