Industrial splice box for DIN rail mouting

Field of application

euroclust offers a fiber optic splice divider for industrial applications which can be mounted on a DIN rail. The splice box can either be ordered empty or assembled with adapters and pigtails.
Features

- 6 different front plates available
- with integrated splice tray and various splice protection holders either for fusion splice protection or crimp splice protection
- for max 12 fibers
- high quality aluminium holder
- available either as empty box, with mounted adapters or also with dismantled and inserted pigtails, ready for splicing
- fiber optic cable entrance through cable glands (PG11, top or bottom straight or slant)
- implementation of pre- connectorized FO cables possible
- robust and stable industrial steel execution
- painted in colour RAL 7035 light grey, other colors on special request
- beside standard labeling strip any special labeling is possible
- when LC duplex adapters are used, they are also available with integrated shutter
- when SC simplex or SC duplex adapters are used separate pluggable retractable dust cups are available
- 4 x removable rodent protection
